Using the URLconf defined in `backend.urls`, Django tried these URL patterns, in this order:

```
1. admin/
2. api/ [name='api-overview']
3. api/ send-message/ [name='send-message']
4. api/ stream-response/<str:task_id>/ [name='stream_response']

15.
16. accounts/
17. api/download/<str:file_path>/ [name='download_file']
18. ^media/(?P<path>.*)$
```

The current path, `api/accounts/google/login/`, didn't match any of these.

You're seeing this error because you have `DEBUG = True` in your Django settings file. Change that to `False`, and Django will display a standard 404 page.

AI Chat - Ask About Fruit Diseases

AI: Hello! Ask me about any fruit disease.

You: tell me about apple scab

AI: tell me about apple scab Apple scab is a fungal disease that affects apple trees, causing unsightly and unmarketable fruit. The disease is caused by the fungus Venturia inaequalis, which overwinters on fallen leaves and twigs. In the spring, spores are released and infect the buds and young leaves of the apple tree. Symptoms of apple scab include brown, circular lesions on the leaves, which can coalesce to form larger areas of blight. The lesions may also appear on the fruit, causing a

Request URL: http://127.0.0.1:8000/api/accounts/google/login/?process=login&next=http%3A%2F%2F127.0.0.1%3A8000%2Fapi%2Fapi%2Fcheck-auth%2F%3Ffrontend_redirect%3Dhttp%253A%252F%252Flocalhost%253A5173

Using the URLconf defined in `backend.urls`, Django tried these URL patterns, in this order:

```
1. admin/
2. api/ [name='api-overview']
3. api/ send-message/ [name='send-message']
4. api/ stream-response/<str:task_id>/ [name='stream_response']
5. api/ signup/ [name='signup']
6. api/ login/ [name='login']
7. api/ check-auth/ [name='check-auth']
8. api/ logout/ [name='logout']
9. api/ task-status/<str:task_id>/ [name='task-status']
10. api/ chat-history/ [name='chat-history']
11. api/ chat/<str:chat_id>/ [name='get_chat']
12. api/ save-chat/ [name='save-chat']
13. api/ rename-chat/ [name='rename-chat']
14. api/ delete-chat/<str:chat_id>/ [name='delete-chat']
15.
16. accounts/
17. api/download/<str:file_path>/ [name='download_file']
18. ^media/(?P<path>.*)$
```

The current path, `api/accounts/google/login/`, didn't match any of these.

You're seeing this error because you have `DEBUG = True` in your Django settings file. Change that to `False`, and Django will display a standard 404 page.
